Subject: Endotracheal Tubes/10FR Stylettes - System Transition
Importance: High
Attachments: SunMed ET Tube 5-2009.pdf

The system is transitioning the stock of size 6.0 – 8.5 ET tubes to a single brand. The single brand is the SunMed brand. I have attached a file that displays the SunMed brand ET tube. Please use this file as the guide. **All ET tube brands (Rusch, Mallinckrodt, Teleflex, etc.) in the system, size 6.0 – 8.5, that do not look like the attached are to be replaced with the SunMed brand ET tube. Sunstar Materials only has the SunMed brand in stock. Please DO NOT pull existing stock until you have replacement product available.**

The SunMed brand ET tube does not require the use of a separate stylette. The 10FR (adult) stylette is no longer required to be stocked and can be removed once your agency has changed over completely to the SunMed brand ET tubes.

All non-SunMed brand ET tubes and the 10FR individually packaged stylettes, that are removed, are to be inventoried with appropriate documentation completed on the Sunstar Return for Credit/Expired form. The product and forms are to be boxed up and returned to Sunstar Materials.

Please work to complete this transition no later than the end of February 2010.

Please contact me should you have any questions.
